TMS Training Days 2023 Session Replays

In case you could not attend the TMS Days 2023 in person, this is your chance to purchase all videos.

By Dr. Holger Flick

For the first time in years, TMS was able to celebrate Training Days in-person again! This year, TMS introduced us to the city of Bruges in Belgium. It was a wonderful event with a lot of opportunities for Delphi developers to mingle and exchange their knowledge.

Aside from the social events, there were lots of training sessions with valuable content.

Speakers

Sessions were presented by the best experts in their fields.

- **Bruno Fierens**, CEO of TMS Software.
- **Wagner Landgraf**, Principal Architect and Product Manager of Delphi libraries like TMS Aurelius and TMS XData
- **José León Serna**, Creator of Delphi for PHP/HTML5 Builder and former Director of Engineering and Branch Manager at Embarcadero Technologies.
- **Dr. Holger Flick**, FlixEngineering LLC, computer Scientist & author of many books and training courses about Delphi and TMS technologies.

Sessions

> **Hint**
> Each session can be purchased separately, in case you do not want to purchase all sessions.

- **Wagner Landgraf**
- Anatomy of an HTTP server
- Build your API with TMS XData
- Single sign-on authentication with OAuth and TMS Sphinx
- Building multi-tenant applications
- OpenAPI and Delphi

- **Bruno Fierens**
- High DPI and VCL styles
- Create cross-platform apps with TMS Miletus
- FNC Components Architecture
- **José León Serna**
- Introduction to TMS WEB Core for Visual Studio Code
- Remote Development with TMS WEB Core for Visual Studio Code Server
- **Holger Flick**
- Using FlexCel as reporting engine everywhere
- Connect your database to TMS FNC Maps
- TMS WEB Core with TMS XData backend

Where can I find this?

Simply go to the landing page located at <http://courses.landgraf.dev/p/tms-training-days-2023>. More details about each session and purchasing options can be found there.

Impressions

Learning, dining, and site seeing!

INDEPENDENT · AD-FREE · READER-SUPPORTED

Free to read. Not free to make.

Every tutorial, article, and line of example code on Holger's Code is published without a paywall and without ads. This page is about what keeps it that way.

Professional work, published free

The content here is held to the same standard as professional client work: every tutorial is built as a real project, tested against current versions, documented step by step, and revisited when the frameworks move on. A single in-depth tutorial routinely takes days — and that's before the bills behind it: servers, storage, build infrastructure, licenses, and the hardware everything is verified on.

If an article or tutorial here has saved you an afternoon of debugging, taught you a technique, or helped you ship, it created real value for you. Supporting it isn't charity — it's paying for professional work you found useful, at whatever price you choose. And if you can't, keep reading anyway. That's what the free part means.

Ways to support

KO-FI

Buy me a coffee

A one-time tip — no account, no subscription, any amount.

BOOKS & COURSES

Buy the paid work

The paid tier of everything published free here — and you get something lasting in return.

SPREAD THE WORD

Share an article

Send a tutorial to a colleague, cite an article, subscribe to the RSS feed.

Nothing here goes behind a paywall, whether you chip in or not. But if something on this site earned its keep today, this is where to say so.
