TMS Training Days 2026 in Rotterdam – April 23-24!

By Dr. Holger Flick

I'm thrilled to announce that I'll be speaking at **TMS Training Days 2026** in Rotterdam, and I hope to see you there! After successful events in Lille and Bruges, the TMS team is bringing this incredible two-day developer conference to the **Rotterdam Marriott Hotel** (right across from Rotterdam Central Station) on **April 23-24, 2026**.

Why You Should Attend

This isn't your typical conference with endless PowerPoint presentations. TMS Training Days is designed for developers who want to roll up their sleeves and dive deep into real-world solutions. Over two intensive days, you'll experience:

Hands-On Learning That Actually Works

- In-depth, practical sessions on TMS tools and components
- Live coding demonstrations with real-world examples
- Direct access to the TMS technical team to get your questions answered
- Learn from speakers who use these tools in production environments every day

Network With Your Peers

- Connect with developers from around the world who are solving similar challenges
- Share experiences and best practices during the community evening event
- Build relationships that extend beyond the conference

Get More From Your TMS Investment Whether you're working with TMS WEB Core, FNC components, FlexCel, or any other TMS technology, you'll leave with concrete techniques you can immediately apply to your projects.

Beyond the Sessions

I'm always up for a chat about Delphi during the social events over a drink and good meal. As a **GitKraken Ambassador**, I'm also happy to discuss version control and AI in development if you want to touch on that subject.

What's Included

Your **€595 ticket** covers everything:

- Access to all sessions on both days (April 23 & 24)

- Lunch on both days
- Community evening event for networking and connecting with fellow developers
- Direct interaction with TMS experts and speakers

Why Rotterdam?

The Rotterdam Marriott Hotel offers a perfect venue with modern facilities and easy access via Rotterdam Central Station. Whether you're traveling from within the Netherlands, Belgium, Germany, or flying in from further afield, Rotterdam's excellent transportation connections make it easy to attend.

Seats Are Limited – Register Now!

With the intimate format of TMS Training Days, seats fill up quickly. The limited capacity ensures you get quality interaction with speakers and the TMS team, but it also means you need to secure your spot early.

Ready to level up your development skills? Register today: https://tmstrainingdays.com

I'm looking forward to sharing my knowledge and experience with you in Rotterdam. Whether you're working on desktop applications, web projects, or bridging legacy systems with modern technologies, you'll find valuable insights and practical solutions at this event.

See you in Rotterdam on April 23-24!

INDEPENDENT · AD-FREE · READER-SUPPORTED

Free to read. Not free to make.

Every tutorial, article, and line of example code on Holger's Code is published without a paywall and without ads. This page is about what keeps it that way.

Professional work, published free

The content here is held to the same standard as professional client work: every tutorial is built as a real project, tested against current versions, documented step by step, and revisited when the frameworks move on. A single in-depth tutorial routinely takes days — and that's before the bills behind it: servers, storage, build infrastructure, licenses, and the hardware everything is verified on.

If an article or tutorial here has saved you an afternoon of debugging, taught you a technique, or helped you ship, it created real value for you. Supporting it isn't charity — it's paying for professional work you found useful, at whatever price you choose. And if you can't, keep reading anyway. That's what the free part means.
